

Glowing Playdough Recipe

You will need:

- 3 cups flour
- 1 cup salt
- 2 tbsp cream of tartar
- 2 tbsp oil
- 2 cups boiling water
- 180ml of non-toxic glow-in-the-dark paint*

Method

1. Mix together the flour, salt, cream of tartar and oil in a large mixing bowl.
2. Add the boiling water to the other ingredients in the large bowl.
3. Stir the mixture well until it is combined together.
4. Add the glow-in-the-dark paint.
5. Once you feel it has cooled enough, roll it out on a flat surface and knead it together.
6. Add a little more flour if the dough is too sticky.
7. Place your dough under a strong light source to charge the glow!

*This playdough is not edible and you should wash your hands after making or playing with the dough. Some glow-in-the-dark paint needs a black light to glow – check the paint instructions to ensure that the paint being used is active under normal lighting conditions.
